1. Introduction

EMBELINK TECHNOLOGIES – known as – EMBELINK – a name stands for excellence in embedded manufacturing and service industry. EMBELINK was established by technically qualified engineers in 2014.

EMBELINK is recognized for standing in market place with great customer satisfaction and as one of the trusted name offering quality products and solution in Embedded and IoT field with strong services.

EMBELINK is a small close-knit company with well-qualified and trained manpower.

1.1 Location

EMBELINK is located in Ahmedabad – a commercial hub-town of GUJARAT state in INDIA. This area is well developed with all necessary facilities like – Electricity, Water, Road, Transportation and support industries.

1.2 Nature of Business

Manufacturers and sales of industrial electronics and process control instruments and micro-controller based control system for Transformer, Electrical utility center, Power-Energy, Medical, Banking, Security, Textile, Petro-chemical, Fertilizer, Chemical etc.

Also, providing customized application development services in field of embedded, IoT and IT or combinations of any for the above said industries.

2. Technical Expertise

Promoters are having 15+ years of rich industrial experience and having expertise in developing customized application or product using following advanced technologies :

- Advanced interfaces like : UART, I2C, SPI, RS-232, RS-485, Ethernet, USB, CANBUS etc.
- Advanced interfacing of module like : GSM / GPRS, GPS, LORA, Wi-Fi, RFID, Blue-tooth, Zigbee, InfraRed, RF etc.
- Advanced universal protocols like : DLMS, TCP/IP, MODBUS, Profibus etc.
- Advanced PCB Designing : Single-side, Double-side and Four layer board.

3. Product List

- Transformer Protection Relay for Power transformers and Dry type transformer.
- Energy meter gateway (GPRS Modem) for single and three phase LT & HT energy meters.
- LoRa Based GPRS modem solution for agriculture and LTMD area.
- Blood warming system, Rectal and skin temperature monitoring device for Medical Application.
- Ethernet TCP/IP based banking security product.
- Industrial SMPS.
- Energy efficient system for Solar based street light.
- USB and RF based Gate controlled device for automatic toll collection booth.
- Xbee based data logging system for temperature and humidity.
- Customized embedded and IoT application development.

4. List of Major Customers

- Transformer & Rectifiers, Ahemdabad
 - United Trafo Tech, Delhi
 - Power Lite Transformers, Ahmedabad
 - SKP Transformers, Ahmedabad
 - Mexlan Power, Bangladesh
 - Tula Trans Electrical, Surat
 - Sunrise Transformers, Vadodara
 - Power Linc Transformers, Orrisa
 - Synergy Transformers, Rajkot
 - Jyoti Transelect Transformers, Bhuj
 - Brooklyn Transformers, Ahmedabad
 - Decent Solutions, Ahmedabad
 - Mivan Technologies, Ahmedabad
 - Cresco IT Systems Pvt Ltd, Ahmedabad
 - Emertech Electronics System, Vadodara
- And many more
